Profile

José Giovinazzo, the independent developer behind Sapara Digital. Websites, mobile apps and business software, with one point of contact from defining user journeys to development and ongoing support.

Based in Corsica, I work remotely with businesses and public-sector organisations in France and internationally. Communication, deliverables and approval stages are agreed at the outset.

Skills

Frontend and user experience · HTML, CSS and JavaScript. Responsive interfaces, keyboard navigation, interactions and multilingual content integration.

Backend and data · PHP, APIs, data validation and access control. Firebase, local storage and JSON persistence chosen around the product's needs and constraints.

Web and commerce · WordPress and WooCommerce. Existing website improvements, integrations, maintenance and client handover.

Applications and real-time systems · Flutter, Dart, Firebase, Socket.IO and WebSocket. Accounts, synchronisation, mobile interfaces, Android TV and app publishing.

Architecture and game systems · Godot 4, GDScript and a Go server. Client-server separation, game rules, terrain interactions and character behaviours.

Delivery and continuity · Git and GitHub, deployment, documentation and maintenance. A clear scope, identified third-party costs and a handover planned with the client.

Selected projects

L'Ortu di Ghjaseppu · WordPress & WooCommerce

Improvements to a WordPress and WooCommerce website: mobile layouts, navigation, interactions and technical support.

Casa Suprana · Hospitality & booking

A hospitality experience bringing rooms, dining and activities together in a seamless journey, from discovery to choosing a stay.

Valmer-sur-Rive · Municipal portal & citizen services

A municipal portal bringing news, procedures and practical information together around residents' needs.

Sapara Digital · Studio website & proprietary assistant

A three-language experience combining project case studies, an interactive 3D sculpture and a PHP conversational assistant, without an external AI API.

Language and working arrangements

French: native. Italian: good working proficiency. English: written communication and technical documentation.
